Yashawini C Matad
#727/7,7th cross
Siddaveerappa Layout
Davangere-577004

Ph. No : +91-8088824541
Email : yashaswini.matad18@gmail.com

Career Objective:

As a front-end developer, I seek to apply my proficiency in HTML, CSS, and JavaScript to create compelling and user-friendly web interfaces. Committed to staying current with industry trends, I aim to contribute innovative solutions that enhance user experiences and drive project success.

Experience:

Technology Associate | November 2021 – February 2023
Locuz Enterprise Solution Ltd, Hyderabad, Telangana – 500081.
Responsibilities:

- Observe security solutions; SIEMs, firewall appliances, intrusion prevention systems, and analysis tools.
- Detect and investigate information security incidents.
- Remediating the incidents, if possible, otherwise will gather information, raise a ticket, write the description then escalate to the next level.
- Generate daily reports, weekly reports, and monthly reports on time.
- Communicate with Customers regarding detected incidents and suspicious activities.

Projects:

- Title: Upturn Smart Online Examination System.
  This project is about maintaining the database of Student Login, Student Registration, and Admin Login and registration and conduction of exams online. This is the DBMS project using JAVA and XAAMP servers.
- Title: Library Database Management System.
  This is a project about storing the details of the books in the library effectively in memory. This is the File Structure project using Turbo C++.

- Title: Wholesale Management System
  A wholesale management system efficiently organizes Inventory, tracks bulk orders, and manages customer and supplier data. It streamlines wholesale operations by overseeing Inventory levels, facilitating order processing, and maintaining essential business relationships for efficient wholesale management.
- Title: Rescue Support System
  Engineered a remote-controlled robot with camera and VR integration using Raspberry Pi and Arduino. Demonstrated expertise in robotics, IoT, and virtual reality. Key features: Remote control via smartphone app, and Real-time camera sync with user's head movements.
