Career Objective:

As a front-end developer, I seek to apply my proficiency in HTML, CSS, and JavaScript to create compelling and user-friendly web interfaces. Committed to staying current with industry trends, I aim to contribute innovative solutions that enhance user experiences and drive project success.

Experience:

Technology Associate | November 2021 – February 2023

Locuz Enterprise Solution Ltd, Hyderabad, Telangana – 500081.

Responsibilities:

- Observe security solutions; SIEMs, firewall appliances, intrusion prevention systems, and analysis tools.
- Detect and investigate information security incidents.
- Remediating the incidents, if possible, otherwise will gather information, raise a ticket, write the description then escalate to the next level.
- Generate daily reports, weekly reports, and monthly reports on time.
- Communicate with Customers regarding detected incidents and suspicious activities.

Education Qualification:

Bachelor of Engineering – 2020 | Information Science

G M Institute of Technology | Davanagere, Karnataka.

Professional Skills:

- Operating System : Windows 10.
- Languages : C, C++, Java.
- Frontend Tools: : HTML5, CSS3, JavaScript, React JS.
- Databases : MySQL.
- Microsoft Package : Microsoft Word, Microsoft PowerPoint.
- IDEs Known : Eclipse.

Personal Skills:

- Self-learning, flexibility at work, motivation to acquire more knowledge, and ability to work efficiently as a part of the team as well as individually.
- Team Management, Leadership Skills, Time Management, Self-Motivated, Good Communication.

Projects:

- Title: BlinkIt Clone.
This project involves performing CRUD (Create, Read, Update, Delete) operations on grocery items. Additionally, it incorporates cart functionality utilizing local storage to manage user selections and purchases seamlessly.
- Title: To-do Application.
This project encompasses CRUD operations with user authentication and authorization, including login and signup functionalities. It also features protected routing to ensure secure access to specific routes based on user roles or permissions.
- Title: News Application
This web project leverages an API database to dynamically fetch and display news content online. Users can access up-to-date news articles and information through the website's interface.
